DIY installation

Use your existing fireback and grate

Makes the open fire controllable

Increases the output of a back boiler

Made in Ireland

Doras is Irish for Door and this is exactly what this is. The Doras is a Firefront that can be retrofitted to most standard 16" or 18" fireplaces. This unit lets you control the burn rate of your open fire and can be used in conjunction with an existing back boiler making your fire more efficient and increasing the output of your back boiler. Just think of the wastage you have with your open fire - Solve this by fitting the Doras Firefront .
