STOVES

Hamco is a family run company with more than 40 years experience in the developing and manufacturing of home heating appliances. That is why when it came to choosing a material for our range of stoves we chose cast iron.

The advantages of cast iron

There are many benefits of cast iron over other materials; for example, once the fuel has expired the stove will retain heat for much longer. Cast iron has also proved to be more durable under high temperatures than other materials. Unlike steel, cast iron can be moulded into a large range of textures and designs giving our stoves their traditional appeal and added beauty.

Please consult your dealer with regards to choosing the right Hamco stove for your intended installation, but be assured that by choosing a Hamco stove, these appliances will not only serve you well, but will do so with the minimum of maintenance, maximum of efficiency and will add beauty and warmth to your home for many, many years to come.

Hamco, helping to heat homes since 1966

Distance: floor to centre of back flue 525mm (approx.)
Distance: rear to centre of top flue 235mm (approx.)
Weight: 170kg
Max log size: 41cm

The Allen

This compact little stove offers a high output for its size and that is due to the inner wall being made of cast iron and not clay brick as most other stoves are. With its simple design it is sure to suit every taste.

Heat output: 7Kw

Features:

- Attractive cast iron construction
- Retains heat long after fire has expired
- Powerful airwash to help keep the glass clean
- Optional Top or Rear Flue outlet
- Ability to burn either wood or solid fuels
- External riddling system

Colour Options:
Matt Black only

Dimensions:

H: 615mm
W: 460mm overall
D: 470mm overall
Flue Outlet: 125mm
Distance: floor to centre of back flue 450mm (approx.)
Distance: rear to centre of top flue 130mm (approx.)
Weight: 93kg
Max log size: 30cm

The Ennell

With its classic double door styling the Ennell is the perfect stove for creating a wonderful real fire atmosphere wherever it is installed. The Ennell will allow you to burn longer logs than most stoves of its size.

Heat output: 8Kw

Features:

- Attractive cast iron construction
- Optional Top or Rear Flue outlet
- Powerful airwash to help keep the glass clean
- Ability to burn either wood or solid fuels
- External riddling system
- Retains heat long after fire has expired

Dimensions:

H: 610mm
W: 615mm overall
D: 385mm overall
Flue Outlet: 150mm
Distance: Floor to centre of rear flue outlet is 445mm (approx)
Distance: Rear to centre of top flue outlet is 120mm (approx)
Weight: 125kg
Max log size: 45cm

The Ree

This medium sized stove is enough to heat any middle to large sized room. It has an arched door with polished handles and knobs that distinguishes the Lough collection.

Heat output: 9Kw

Boiler Model: 5Kw / 17,000 BTU/ hour to water

Ree Petite

This is the baby of the family. It sits perfectly on a standard hearth making it ideal for any small living room or as an added heat source to a larger room.

Heat output: 4.5Kws

Ree Dimensions:

H: 715mm
W: 570mm overall
D: 485mm overall
Flue Outlet: 150mm
Distance: floor to centre of flue outlet 535mm (approx)
Distance: rear to centre of top flue 225mm (approx.)
Weight: 130kg
Max log size: 34cm
